To whom it may concern,

Testimonial for Harold Robinson

Afrimat has, over the last number of years, embarked on a serious drive to improve our preventive maintenance skills and business outcomes. We have achieved major improvements in plant reliability and enabling maintenance practices, thereby significantly reducing production losses due to unplanned machine failures. A major contributor to this achievement has been the training provided to our staff by Harold Robinson.

Harold has been providing training to Afrimat since 2011 in the subject fields of Maintenance Management and Root Cause Analysis. In addition to this he has also facilitated training on our new in-house maintenance management system. This training has been done at various locations around the country over a 12 to 18 month period.

Delegates have learnt substantially from Harold's training and are applying the principles and techniques taught.

I commend Harold for training or consulting on any Maintenance Management, Root Cause Analysis and/or related topics in your company.

Kind regards
